Under date of June 25 Acting Assistant Surgeon De Forest, at Libau, reported 2 cases of cholera with 2 deaths at St. Petersburg for the week ended June 24, and that cholera had broken out along the chief division of the Trans-Caspian Railway.

LIBAU—Smallpox—Examination of Emigrants.

Acting Assistant Surgeon De Forest reports, June 25:

During the week ended June 19, 5 cases of smallpox, with 1 death, were reported at Libau. Twenty-four cases remain under treatment. On account of the large number of smallpox cases now present and the practical presence of the disease at Libau during the entire year all passengers by the Russian-American line have been required since May 10 to be vaccinated prior to embarkation. The results, as observed at the sailing of the last vessel, showed that only about 1 case in 30 persons vaccinated failed to take.

The steamship *Lituania* sailed from Libau June 22 with 914 passengers and a crew of 100. All had been in Libau for five days under observation.
